"It is a scientific fact that the Boyat Baking Powder to sheebitely pure. "I have examined a package of Royal Bakear Freeder, purchased by myself in the market. I find it entirely free from as in the or any other injurious sub-stance. HENRY MORTON, Ph.D., President of Stevens institute of Technology." The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1953; at the Commend, Phillutelphia, 1959; at the American Institute, New York, and a State Far a throughout the country.

No other article of human food has ever received and high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world. "I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome "E. Dana Haves, State Assayer, Mass."

Note—The above Diagram illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by each can calculated, the reach coing is a constraint of the Royal Baking Pord, Scheller only proves what every observant constitutes of the Royal Baking Powder knows by practical experience, that, while it courts a few courts per pound more than ordinary kinds, it is far more economical, and, besides, affords the nivantage of better work. A single trial of the Royal Baking I moder will convince any fair-minded person of these facts. • While the diagram shows some of the alum possions to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicat-ing that they have any value. All alum providers, no market is a their strength, we to be avoided as dangerous.
